PLEASE READ CAREFULLY**Conditions of Sale**

This price list supercedes all previous lists. We offer unusual trees, shrubs and evergreens. While we carry a complete line of nursery stock, we list only items that are unusual and can be packed and shipped with perfect safety.

Prices in this catalog do not cover stock specially selected by the customers at the nursery, which will be charged according to its value regardless of size. Also specially selected material to conform to the customer's particular specifications would rate an additional charge.

All our stock is guaranteed true to name and up to the grade and quality ordered, and after leaving our nurseries in good condition our responsibility ends. See to it that the plant material does not dry out. If you are not prepared to plant the trees on arrival, moisten the bundle with a hose. Prepare the holes, then unpack and plant. Do not open up the bundle until the holes are ready for planting.

All material is freshly dug, and we can generally ship all winter, from early November until May. At certain intervals during January and February, the ground may occasionally be frozen for a week or two.

No charge for packing except on Weeping Cherries, and heavy specimen trees that have to be packed in a box or crate, or that would cost considerably more than the average packing. Freight and express charges are to be paid by the purchaser.

Plain and explicit shipping directions should be given with every order, naming freight or express office if different from post office. Our responsibility ceases when delivered to the express or freight office in good condition. Claims for shortage, or other complaints, must be presented within ten days after arrival of the plant material.

CASH WITH ORDER, except to persons who satisfy us as to their financial responsibility, when accounts will be due in 10 days. C.O.D. orders must be accompanied by one-third of the amount involved.

Flowering Trees

AESCULUS (Horse Chestnut). Pink flowering. A very showy tree, quite rare; flower spikes deep pink.

3 to 4 ft.....	\$3.00	8 to 10 ft.....	\$10.00
4 to 5 ft.....	4.00	10 to 12 ft.....	12.00
5 to 6 ft.....	6.00		

AMYGDALUS PERSICA. The most showy and colorful of all the flowering trees without exception. The colors are striking and range from the deepest and most brazen reds to the most delicate pale pinks and snow whites. A 3 to 4 year old tree is one mass of color from top to bottom. It is also one of the trees where you get the most for your money in quick results, as it is unquestionably the fastest growing of all the flowering trees, but it never attains a very great height or spread. We offer the following varieties:

	18-24"	2-2½'	4-6'
Aurora, dbl. pale pink.....	\$0.75	\$1.50	\$3.00
Clara Meyer, dbl. clear pink....	.75	1.50	3.00
Cerise.....	.75	1.50	3.00
Red.....	.75	1.50	3.00
Red, very early.....	.75	1.50	3.00
White, snow white.....	.75	1.50	3.00
Weeping, dbl. red.....	1.00	2.00	3.50
Weeping, mixed colors.....	1.00	2.00	

The above are field grown.

Trees from pots or tubs cost \$1.00 more each.

CHIONANTHUS VIRGINICA (White Fringetree). Practically unknown or at least rarely planted, as it seems but few are aware of its exoticness. It is a large growing shrub, or a small tree, with fragrant white fringed flowers in 12 inch clusters. We recommend this tree or shrub very highly.

18 to 24 in.....	\$0.50	6 to 7 ft.....	\$5.00
5 to 6 ft.....	4.00	8 to 10 ft.....	10.00

FLOWERING DOGWOOD (Cornus)

CORNUS FLORIDA (White Flowering Dogwood). Extremely heavy stocky plants. Most of our trees have one central leader, while others have multiple leaders, all branched to the ground. You may have your choice. Many of the specimens are half as wide as they are high.

	Each	Ten
18 to 24 in. Seedlings.....	\$0.60	\$5.00
2½ to 3 ft.....	1.50	12.50
3 to 4 ft.....	2.00	15.00
4 to 5 ft., low branched.....	2.50	20.00
5 to 6 ft., low branched.....	4.50	35.00
6 to 7 ft., low branched, heavy.....	5.00	45.00
7 to 8 ft., low branched, heavy.....	7.50	60.00
8 to 10 ft., low branched, heavy.....	12.50	100.00
10 to 12 ft., low branched, heavy.....	20.00	150.00
Standards or tree form, high trunks.		
12 to 14 ft. high, 5 to 6 ft. trunks.....	\$15.00 to \$20.00 each	

Cornus continued

CORNUS FLORIDA RUBRA (Red Flowering Dogwood). This variety is listed according to the nurseryman's individual idea as pink dogwood or red dogwood, but in every case it covers the same variety. When the flowers of the Red Dogwood are unfolding during a cool season, they will be deep pink or red. If the season is warm, the flowers will be paler, but yet distinctly colored. Deep Pink would be a good description.

	Each	Ten		Each	Ten
2 to 2½ ft.	\$2.00	\$18.00	4 to 5 ft.	\$5.00	\$45.00
2½ to 3 ft.	2.50	20.00	5 to 6 ft.	7.00	65.00
3 to 4 ft.	3.50	32.50			

We have also a special strain of very pale pink Dogwood, sizes 7 to 9 ft. high.

CORNUS FLORIDA PLENA (Double White Flowering Dogwood). Rare.
2 to 3 ft. \$3.00 each

CORNUS KOUSA (Oriental Dogwood). June Flowering Chinese Dogwood.
3 to 4 ft. \$2.00 each 10 to 12 ft. \$25.00 to \$30.00
4 to 5 ft. 2.50 each 12 to 14 ft. 35.00 to 40.00

CORNUS MASCULA (Cornelian Cherry). Bright yellow flowers in March or early April.
2 to 2½ ft., \$0.75 each; \$6.00 per 10.

CRATAEGUS (Hawthorn). A fine ornamental tree for the lawn.

C. Oxycantha pauli (Paul's Scarlet Hawthorn), with double scarlet flowers.

C. Rosea flora plena (Double Pink English Hawthorn).

6 to 7 ft. \$4.00 7 to 8 ft. \$6.00 8 to 10 ft. \$10.00

GLEDTISIA TRIACANTHOS INERMIS (Thornless Honeylocust). An attractive, open-growing, thornless locust; an ideal shade tree. The parks and other public projects have just discovered the value of this fine, flowering tree. Large clusters of fragrant white flowers.
5 to 6 ft., \$2.00 each; \$15.00 per 10.

GORDONIA ALTAMAHA (Franklinia). White flowers fragrant; large dark green foliage. Very rare
1½ to 2 ft. \$2.50 4 to 5 ft. \$6.00
2 to 3 ft. 3.50 5 to 6 ft. 7.50
3 to 4 ft. 5.00

LABURNUM VOSSI (Golden Chain, Golden Shower). Also known as "Yellow Tree Wistaria." An upright growing tree producing very long clusters of golden yellow blossoms.
5 to 6 ft. \$4.00 7 to 8 ft. 7.50
6 to 7 ft. 5.00 8 to 9 ft. 12.50
9 to 10 ft. 15.00

MAGNOLIAS

Our trees are exceptionally well grown, root pruned or transplanted, covered with flower buds. Our great show specimen trees are not matched anywhere in the country for shapeliness and well-rounded appearance, and are the best in the entire East, according to the Federal Inspectors.

MAGNOLIA ALBA SUPERBA. White, occasionally suffused with pink; vigorous grower.

6 to 8 ft. \$15.00 each 8 to 10 ft. \$25.00 each
Heavy specimen trees, \$35.00 to \$100.00 each.

M. ALEXANDRINA. Grows more slowly than *Soulangeana* and blooms a week later a deeper pink. Compact and bushy trees.

	Each	Ten		Each
2½ to 3 ft.	\$5.00	\$45.00	4 to 5 ft.	\$8.50
3 to 4 ft.	7.50	65.00	5 to 6 ft.	10.00

Broad heavy specimens, 8 to 12 ft. high, \$25.00 to \$50.00 each.

Magnolias continued

M. GRANDIFLORA (Southern Evergreen Magnolia). A strain hardy in the Philadelphia area.

3 ft., \$10.00 each; 4 ft., \$15.00 each; 5 ft., \$20.00 each.

M. LENNEL. Heavy crop of bloom in late spring. Flowers all summer.

A few trees 3 to 5 ft. high at \$5.00, \$7.50 and \$10.00 each.

Heavy broad specimens, 10 to 16 ft. high, \$35.00 to \$75.00 each.

M. LILIFLORA (by some incorrectly called *Purpurea*). Flowers brownish-purple, lily shaped.

3 to 4 ft., heavy bushes	\$4.00 each
4 to 5 ft., heavy bushes	5.00 each
5 to 6 ft., heavy bushes	6.50 each

M. NIGRA and **PURPUREA**. Dark purple flowers. These varieties we can supply in heavy specimens only, 10 to 12 ft., \$25.00 to \$40.00.

M. SOULANGEANA (Saucer Magnolia). Pink. Best known of all the Magnolias. Blooms all summer when well established.

2 to 2½ ft.	\$3.00
2½ to 3 ft.	4.00
3 to 4 ft.	5.00
4 to 5 ft., heavy, branched low	7.50
5 to 6 ft., heavy, branched low	10.00
6 to 8 ft., heavy, branched low	12.50
8 to 10 ft., heavy	\$15.00 to \$20.00

Extra heavy specimen, 8 to 16 ft. wide, 12 to 16 ft. high, at \$35.00 to \$150.00.

M. STELLATA (*Halleana*). Star Magnolia. Star shaped, snow-white flowers, very fragrant.

2 to 2½ ft.	\$3.50	4 to 5 ft.	\$10.00
3 to 4 ft.	7.50	5 to 6 ft.	15.00

M. YULAN (*Conspicua*). Pure white, fragrant.

3 to 4 ft., slender plants	\$4.00
4 to 5 ft., slender plants	6.00
8 to 10 ft., heavy, specimen	20.00
10 to 12 ft., heavy, specimen	35.00

The two larger sizes have a central leader, branched to the ground.

FLOWERING CRAB (*Malus*)

The Chinese Flowering Crab has justly been called the "Queen of the Garden." Even though Crabs are not so well known as the Cherries, several varieties have no rivals among the Flowering Trees. About the same directions apply as for the Japanese Cherries, with the exception that Crabs have a wider range of adaptability to soil; wet or dry, rich or poor. Of course, they respond with more growth to good soil and culture. Some varieties, such as *Atrosanguinea*, will stand shearing especially well. They may be sheared into a pyramidal, standard or ball-shaped tree. All pruning and shearing are done after the flowers have passed.

The varieties *Atrosanguinea* and *Floribunda* lend themselves particularly well to planting as hedges. They are 100% hardy anywhere and will stand clipping or shearing into a typical hedge, or if desired they may be permitted to grow tall enough to be a sheared screen. They would make an effective hedge in New England, or any other Northern State with cold winter climate, where privet is an impossibility. The foliage is glossy, fairly small, and very attractive. The trees will flower just as well in a clipped hedge as when growing naturally, un-sheared. If 2-3 ft. trees are used, they should be spaced 2 ft. apart, and for the 3-4 ft. size the spacing should be 2½ ft.

In more recent years Garden Clubs have begun to appreciate the value of colorful fruits, and it is not overstating the fact that Flowering Crabs, such as *Eleyi*, *Hopa*, *Floribunda Purpurea*, and many others, have absolutely the most colorful fruit in existence.

Most of the varieties of Flowering Crab were either introduced or publicized by me. I have been growing flowering trees, especially Flowering Crab, for over twenty years, and have managed to educate our organization so thoroughly in the peculiarities of each variety, that it can identify the varieties at any time, summer or winter, in leaf or without foliage, in bloom or in fruit, which is, to judge from what I have been able to observe, considerably more than any other nursery in the United States can do, as in many cases trees sold by others are utterly misnamed and thoroughly scrambled. It is not because they do not want to send out trees correctly named, but because they simply don't know the difference in the various varieties. *Bechtels Crab* will probably always be delivered to you true to name no matter where you buy them, but this is more than can be said for the rest of the varieties.

The Flowering Crabs are hardy anywhere, in the mountain States, North Dakota, or in the hotter States, such as Texas and the Gulf States. The only varieties subject to cedar rust appear to be *Ioensis* or *Prairie Crab*, *Bechtels*, which is the double form of the *Prairie Crab*, *Coronarius*, *Angustifolia*, and to a minor degree *Niedzwetzkyana*. All the rest are entirely immune.

ALL HAVE PERFECT ROOT SYSTEM AND GOOD TOPS. DO NOT PRUNE OR CUT BACK. OUR TREES CAN SUPPORT ALL THE TOP BECAUSE YOU GET 100% OF THE ROOTS. ALL OF OUR CRABS, WITH THE EXCEPTION OF BECHTELS, ARE ON THEIR OWN ROOTS, NOT ON WILD UNDERSTOCK THAT MAY SPROUT FROM THE BASE AND GIVE YOU TROUBLE.

MALUS ALDENHAMENSIS. A new crab from England: a good red flower, medium sized colored fruit. Under favorable conditions, an additional crop of bloom will appear in September, and much to my surprise these September flowers are all double—quite different from those that appear in the spring. The flowers of this variety are probably the most colorful of all the varieties.

Malus continued

- M. ANGUSTIFOLIA.** A double flowering form of the wild Southern crab. This variety appears to be subject to cedar rust.
- M. ARNOLDIANA** (Arnold C.) This variety resembles in a general way the somewhat delicate Halliana or Parkmani, but it is very much stronger growing. Flowers are pink, semi-double, early; splendid foliage; yellow fruit; very popular.
- M. ATROSANGUINEA** (Carmine C.), single; red; bush form; early flowering. It may be used in varied positions: as a screen, or a perfect hedge 3 to 10 feet high. Lends itself to shearing, and can be sheared into columns, arches, hedges, and round-headed standards as perfectly molded as a ball. We have a few old specimen trees of this variety that are 15 ft. high with a spread of about 12 feet, and a trunk up to the first branches of 6 to 7 feet high. This variety, and Floribunda, can readily be trained into any style, form, or shape desired, even espalier.
- M. BACCATA.** Fragrant, white flowers, cherry red fruit approximately the color of half ripened red cherries—a uniform scarlet color all around. Growth vigorous, pyramidal or cone shaped tapering to the top from a broad base. Fruit fine for jelly.
- M. BACCATA CERACIFERA** (Cherry Crab). The fruit on this variety is a trifle larger than sweet cherries, a brilliant red color and produced in abundance; excellent for jelly. The flowers are white, fragrant.
- M. ELEYSI.** The best red-leaf sort in the spring coloring. Occasionally the tree will retain its color throughout the entire season, from spring until fall, but most of the trees turn green during the summer. The fruit is brilliant scarlet and very conspicuous: of excellent quality for jelly. During flowering period the tree is smothered with large red flowers in clusters.
- M. FLORIBUNDA.** Single; pink; early; spreading. Yellow fruit, slightly tinted red. An old, well-known variety and for that reason one of the best sellers.
- M. FLORIBUNDA-PURPUREA,** one of the best; copper beech color foliage and flowers of beautiful red-violet; dark purple fruit, which is retained on the tree from August until late November. When the tree is in bloom, it is absolutely covered with deep purple blossoms more densely than any other variety with the exception of Hopa and Eleyi. Standard or Tree Form.
- M. HOPA,** large flowering, purple leaf Crab. Very hardy and prolific bloomer; showy dark red fruit which is very colorful from August until late in November: quite formal and shapely growth. Red flowers. Foliage green during the summer. Has a distinct tendency to form a central leader; decidedly more regular in habit than most of the foregoing, with the exception of the two varieties of Baccata.
- M. IOENSIS** (Prairie Crab). Grows wild in most of the States. The flowers are large, clear pink, fragrant, and resemble the wild rose. The only objection is the abundance of green apples that are hard as stone. They may be good for jelly, but I am inclined to doubt that. A cedar rust subject.
- M. IOENSIS BECHTELI** (Bechtels Crab). The familiar, fragrant, double rose-like variety.
- M. MICROMALUS** (Midget C.), flowers pink tint; single; dwarf habit. An extra choice sort. NEW. Compact growth, vase form. The long, slender branches covered with flowers suggest garlands of flowers. Real quality, a prime sort.

Malus continued

- M. NIEDZWETZKYANA.** Red flowers, large red fruit, foliage exactly like fruiting apple leaves. The apples are good, and that is the only reason we are listing this variety. As a flowering tree it is not nearly so desirable as any of the rest because it is extremely dilatory about coming into bloom. It has to reach a definite degree of maturity before there will be any flowers. It is really an apple, and not a crab.
- M. PARKMANI** (Halliana; Parkman C.), double, pink. A dwarf tree, very low growing, just right for small gardens, very hardy, flowers an exceptionally lovely pink. Prolific, one of the first to open and one of the last to fade.
- M. RED SILVER.** A new variety; silver coated foliage; red flowers. The trees originated in South Dakota, and I have not seen the fruit nor the flowers.
- M. RED TIP.** A new variety of great merit; short stemmed red or pink flowers, similar in distribution to plum blossoms; a vigorous grower; an unusual sight while in bloom.
- M. SARGENTI** (Sargent's C.). Dwarf; white flowers; abundant showy red fruit. Good for the small garden and a great favorite on account of the brilliant fruit; with the birds equally popular. Low growing and spreading habit; just the sort for rockeries and small gardens. One of the more striking varieties. Positively true to name. Good for a hedge up to six feet high if trained or sheared; will keep out intruders, even cows and dogs.
- M. SCHEIDECKERI.** One of the most conspicuous pink flowering trees of early spring. Very prolific both in bloom and fruit. Flowers double pink; fruit excellent for jelly. Very hardy; an old sort.
- M. SPECTABILIS ROSEA PLENA.** Very large double pink flowers profusely produced; yellow fruit. Next to Bechtels and Ioensis this variety produces the largest double flowers of all the Flowering Crabs.
- M. SPECTABILIS WHITE.** A white form of the above. Double flowers; yellow fruit.
- M. THEIFERA.** Used for tea making in China; lovely pink bloom; glossy foliage; upright habit. (Not the tea plant, but a Chinese substitute.)

IMPORTANT!!! All our trees are freshly dug to fill your order, and are not kept in storage at any time. They are packed immediately and kept thoroughly covered to the last minute. Therefore, they leave the nursery in good condition and almost invariably grow, the few failures being caused, usually, by insufficient watering at a critical period in early summer before they are established. An extremely hot or dry summer could also kill trees when they are not watered properly.

Magnolia trees and Dogwood trees require careful attention as indicated above; very few other species are in the least troublesome. Trees with soil balls require careful watering, more so than do trees with bare roots.

We have had so few complaints as to losses in transplanting that it hasn't seemed necessary to offer insurance. Recently, however, we have had inquiries as to insurance of growth, so we are offering to **REPLACE ANY TREE THAT DIES WITHIN ONE YEAR IF 20% ADDITIONAL IS PAID FOR INSURANCE BEFORE THE SHIPMENT IS MADE.**

4-5 ft. trunks, 8-10' overall	\$10.00	\$80.00
5 ft. trunks, 12-14' overall	25.00	200.00
Standard Form of Crabs in heavy specimen trees are available in many other varieties, such as Eleyi, Hopa, Floribunda, etc., from \$15.00 to \$100.00.	\$35.00 to \$50.00 each	

IF MALUS ATROSANGUINEA OR FLORIBUNDA ARE WANTED FOR HEDGE PURPOSE, REFER TO PRICES ON PAGE 19

ALL OF OUR FLOWERING CRABS WITH THE EXCEPTION OF BECHTELS, ARE ON THEIR OWN ROOTS, NOT ON A WILD UNDERSTOCK THAT MAY SPROUT AND GIVE YOU TROUBLE.

RECOGNIZED AMERICAN HEADQUARTERS
for
JAPANESE ROSEFLOWERING CHERRIES

The Japanese ornamental Cherries are among the most beautiful of all the flowering trees and take the lead possibly because of the popular appeal of the well advertised "Cherry Blossom Time" in Washington, D. C.

They vary a great deal in form and therefore are adapted to many uses in decorating the garden, either as specimens on the lawn, in small groups, for lining lanes and avenues, and as vistas. Vistas are made by a double row of trees placed in pergola-like manner 10 to 12 feet apart across the pergola, and spaced about 6 feet in the rows. One or two varieties should be used for this purpose, preferably one.

The colors of flowers range from pure white, to blush and delicately tinted pinks, on through to deep pinks or old rose. These Cherries will thrive in any reasonably good, well-drained soil, with average moisture. In general, the same soil conditions should prevail under which the fruiting types of cherries do best. These can be grown throughout the same areas as the peach, and even somewhat farther north.

AMANOGAWA ZAKURA, light pink; late; double; **pyramidal** or columnar; just right for formal planting or small gardens. A very unusual sort, attracts favorable attention always—yet very rare. Planted two or three feet apart in a straight line, Amanogawa makes a perfect hedge and need never be pruned or sheared.

AUTUMNALIS (winter flowering), semi-double; pale pink flowers; blooms in Fall and early Spring; very **unusual** and rare. During the mild winter of 1930-31 a pair of old trees in a Philadelphia suburb were in full bloom during the entire holiday season, Christmas and New Year's, and it was not a mean petty display, but an abundance of bloom. Yet when spring came, they bloomed just as much it seems. Autumnalis will not bloom during low temperatures in the winter, but responds to a mild period.

BENI HIGAN ZAKURA (Higan Cherry, *P. subhirtella*) "Spring Cherry." First to bloom; very prolific blush pink, small, single flowers that bloom with the last snow of winter. The late "Chinese" Wilson, plant explorer, rates this variety as one of the best of the Japanese Mountain Cherries.

FUJIZAN (Shirotae; Mount Fuji), snow white; large double flowers; vigorous; extra choice. A splendid showy variety, considered one of the better of the **white** double Japanese Cherries.

HOSOKAWA BENI ZAKURA, pink, mid-season; **upright growth**, slight spread; fragrant.

JEANNE WOHLERT, **dwarf**; semi-double; new; rare. The effect of this tree in bloom is that of many branched hyacinth of a lovely soft pink.

KANZAN ZAKURA (Kwanzan), double deep pink; vigorous; upright. The tendency to spread is not evident until the trees are approximately ten years old. While consulting the Superintendent of the Park System in Washington, D. C., I asked him what variety of Flowering Cherry the public seemed to prefer. He replied, "The variety Kwanzan seems to appeal most to the public."

Japanese Cherries continued

KOFUGEN ZAKURA (Fugenzo), double, deep pink. Similar to Kanzan, but slower growth. Not likely to grow straight or have a straight stem.

MOMIJIGARI, similar to Beni Higan in growth, less spreading. Flowers are small, well filled or double, deep pink, produced in great quantities.

MRS. A. E. WOHLERT, our latest introduction; much clearer and more brilliant color than Kanzan or Kofugen. A great improvement. As soon as enough stock is available of this sort, we perhaps may discard the other two varieties. Kanzan is rated in Washington as a leader, but this variety is superior.

NADEN ZAKURA, pink; late flowering; double; **very popular**; vigorous grower; showy and attractive; adapted for street or lane planting; an excellent companion for Kofugen. This variety, as well as Kanzan and Serrulata albo rosea makes excellent pergolas or vistas, if planted in two parallel rows, 10 to 12 feet apart, with 6 to 8 feet between the trees, in the rows.

OJOCHIN ZAKURA (Chinese Lantern), large, semi-double pink flowers; vigorous; strong-growing.

PAUL WOHLERT, semi-double; deep pink or red; fragrant; flowers in great profusion. The earliest of the large hyacinth flowering varieties.

ROSEA (Rose), late; double flowers about $1\frac{3}{4}$ inches in diameter, borne in raceme-like clusters of three or four flowers; vigorous; a spreading sort; a good lane, shade or street tree. A free bloomer and the flowers open fully just as the leaves commence to develop.

ROSY MORN. This variety is a delicate rich pink, fitting in between Naden and Kanzan. The habit of growth is identical with Naden; but the color is much deeper, while not as deeply colored as Kanzan.

RUTH WOHLERT, blush; midseason; **spreading**. An extra good sort with double flowers of attractive tint.

SARGENTI (Yama; Prunus serrulata sachalinensis), single, large flowers of light red violet; early; spring foliage copper beech color, green in summer; a popular sort; **very hardy**; probably the hardiest of all the varieties with the possible exception of Beni Higan, which may be as hardy against cold and low temperature. Considered one of the best for New England.

SERRULATA ALBO ROSEA (Shirofugen), vigorous; light pink; large double flowers; green foliage, late flowering. Similar to Naden and Rosea in habit and color of flowers, but slightly paler.

SHIRO HIGAN, single pink; large flowers; **early**; vigorous. A choice sort. A much improved Yoshino.

SHOGETSU, soft pink; double; large. Has leafy green carpels in center of flower; leaves very pale green. A beauty in every way.

SIEBOLDI is identical with our Naden; at least the difference is not great.

TAIZANFUKUN, flowers single, snow-white; leaves small; grows unusually erect and slender; late. Not well known, but you should by all means plant this variety.

TAKINIOL, flowers of medium size, single and semi-double; buds flesh, open flowers white. Valued for its delightful fragrance.

UKON, unique in having double yellow flowers of good size.

YOSHINO (*Yedoensis*), single blush; red buds; early. This is the tree that borders the Tidal Basin in Washington, D. C. The chief value of this variety, as I see it, is that it blooms so extremely early and in such profusion, that it is quite a revelation after the long winter. Very few trees or shrubs, excepting Beni Higan, Weeping Cherry and Forsythia, are in bloom before Yoshino flowers. Therefore, the planting of this exceedingly beautiful tree is particularly to be recommended. It opens the season of flowers. Mr. Baxter, Horticulturist of Fairmount Park, Philadelphia, is definitely of the opinion that this is the variety that should be featured in parks because it gives "a blaze of glory all at one time that is not equalled by any other early spring flowering tree." There is no objection to planting this variety in such a manner that the branches will lie on the ground. If that effect is wanted, they should not be planted too closely, and the low branches should not be removed. One hundred trees sold at a discount of 50%.

YOSHINO DAYBREAK, delicate flesh pink; single flowers so **dense** as to almost obscure the branches. Flowers are a deeper color and larger than Yoshino.

ALL OF OUR JAPANESE FLOWERING CHERRIES
ARE ON THEIR OWN ROOTS WITH THE EX-
CEPTION OF STANDARD WEeping WHICH ARE
GRAFTED.

JAPANESE WEEPING CHERRIES

SHIDARE HIGAN ZAKURA (*Prunus Subhirtella Pendula*, var. *Rosea*). Pink, early, after Beni Higan, the first tree to bloom in the spring and the first deep pink flowers of the season. It is safe to say it is the first flowering tree of the season in the suburbs of Philadelphia. This variety we offer in the following forms:

Pyramid or Bush Form, branched from the ground up, own roots, in either single or double flowering. The double flowering seems to stay in bloom somewhat longer than the single flowering; the color is identical, but the flowers are very full with approximately two dozen petals.

Standard Form, tree or umbrella shaped. Grafted on trunks or stems from 3 to 5 feet high. All our trees have been top pruned, ready for planting.

FRINGE CHERRY. This is a new weeping Cherry we are introducing. It was propagated from a tree on the property of one of my friends in the vicinity of Philadelphia, who bought a section of an old estate that had been planted to a fine collection of exceptionally rare trees, among them this unusual Weeping Cherry. The flowers are practically white, the branches are thin, pendulent, with small flowers placed so closely on the drooping branches that the effect at a distance is that of a rice curtain, or should I say a tree draped with white fringes. We have been propagating from this tree for several years, but the tree was so decrepit that it was difficult to obtain any wood worthwhile in spite of the hearty cooperation of the owner.

SHIDARE YOSHINO (Weeping Yoshino). Large, single, pure white flowers. Branches much thicker than on Shidare Higan, but spaced further apart. The leaves are much larger. The picturesque shape of the tree with or without flowers or leaves is very attractive.

Packing Extra on Standard Weeping Cherries

FLOWERING ALMOND (*Prunus Glandulosa Sinensis*). Double pink flowers.
 2 to 2½ ft. \$1.50 each 2½ to 3 ft. \$2.00 each

FLOWERING APRICOT (*Prunus Mume*). Very early flowering, and a most lovely tree of delicate colorings. We offer the following varieties:

	2-2½'	2½-3'	3-4'	4-5'	5-6'
Dawn, dbl. clear pink	\$1.50	\$2.50	\$3.50	\$4.00	\$4.50
Early Double Red	4.00	5.00
Mme. Dorbon, shell pink	4.00	5.00

FLOWERING PLUM in the following varieties:

Bliariana (Red-leaf Plum). Double, pink flowers; purple leaves. Red all summer and scarlet in autumn.

Newport. The best red-foliaged plum, but the flowers are not so attractive as those of Bliariana.

Othello. Splendid, deep red leaves.

Triloba. Very desirable low shrub with a mass of double, clear pink flowers; plum-green foliage.

24 to 30 in.	1.50		

WISTARIA TREES (See page 25)

Books

My illustrated book "Flowering Trees of the Orient" gives a correct appraisal of the varieties. It is just as easy to produce and grow a good variety as a poor one — it cost neither more nor less — unless one of them is faster-growing. Therefore, I distinctly point out certain varieties as not desirable compared with the superior sorts.

My Flowering Cherries and Crabs are practically all on their own roots, eliminating the problem of understock, good, bad or indifferent.

Additional copies of "Flowering Trees of the Orient" may be had for 25c each.

In my book "Oriental Wistaria for the American Garden," I have attempted to point out that while the extremely longcluster Japanese varieties are very unusual and worth waiting for, there isn't any doubt but that you will have to wait before they will bloom. Just how long one has to wait is always a little uncertain because that depends on local soil conditions and climate, but after they come into bloom they are far superior and much more unusual than the common sorts. The variety Shiro Noda, white, in the 7- and 8-year-old sizes, have all bloomed during the past season — all of them.

The Chinese Wistaria are likely to bloom immediately. All of our Chinese Wistaria have bloomed in the nursery.

Monograph on Wistaria cost 25 cents.

COLLECTIONS

"Rainbow" Collection \$45.00

- 8 Cherries and 6 Crabs, 5-6 ft.
- Kofugen, dbl. deep pink
- Fujizan, dbl. white
- Naden, dbl. pink, late
- Beni Higan, sgl. bluish, early
- Rosy Morn, dbl., old rose
- Yoshino, sgl. bluish pink
- Shirofugen, light pink
- Weeping Cherry, sgl. pink
- Atrosanguinea Crab, sgl. carmine
- Hopa Crab, sgl. red, apricot colored fruit
- Eleyi Crab, sgl. red, red fruit
- Floribunda Purpurea, sgl. red fl., purple fruit
- Spectabilis rosea plena, dbl. pink fl., yellow fruit
- Micromalus, sgl. pink

\$54.00 Value for \$45.00

"Early" Collection \$16.00

- 8 Cherries, 3-4 ft.
- 2 Yoshino, sgl., blue pink
- 2 Beni Higan, sgl. pink
- 1 Naden, dbl. pink
- 1 Kanzan, dbl. deep pink
- 2 Weeping Cherries, sgl. pink

\$21.00 Value for \$16.00

"Pink" Collection \$7.50

- 3 Cherries and 1 Peach, 3-4 ft.
- 1 Naden, dbl. pink
- 1 Rosea, dbl. pink
- 1 Shiro Higan, sgl. pink
- 1 Flowering Peach, dbl. pink

\$11.00 Value for \$7.50

"Gem" Collection \$10.00

- 4 Crabs and 2 Peach, 3-4 ft.
- 1 Atrosanguinea, sgl. red
- 1 Floribunda, sgl. pink
- 1 Hopa, sgl. rose
- 1 Eleyi, sgl. red
- 1 Flowering Peach, dbl. red
- 1 Flowering Peach, dbl. white

\$13.25 Value for \$10.00

- 14 Crabs, all different
- all labelled, 5-6 ft.
- all hardy in the Dakotas and mountain States

\$42.00 Value for \$30.00

"Happiness" Collection \$15.00

- 10 Crabs, 3-4 ft.
- 2 Eleyi, sgl. red flowers, red fruit
- 2 Atrosanguinea, sgl. carmine
- 2 Floribunda, sgl. pink fl., yellow fruit
- 2 Spectabilis, white dbl. flowers
- 2 Scheideckeri, dbl. pink fl.

\$18.00 Value for \$15.00

"Magnolia" Collection \$12.00

- 1 Alexandrina, deep pink, 3-4'
- 1 Yulan, white, 3-4'
- 1 Soulangeana, pink, 3-4'

Special at \$12.00

"Flowering Peach" Collection ... \$6.00

- 1 Early Red, 4-5'
- 1 Clara Meyer, 3-4'
- 1 Double White, 4-5'
- 1 Double Red, 4-5'

Special at \$6.00

"Flowering Tree" Collection

- 5 Flowering Tree, 4-5' \$12.50
- 1 Fl. Cherry
- 1 Crab
- 1 Fl. Peach
- 1 Fl. Plum
- 1 Pink Dogwood

Special at \$12.50

"Flowering Shrub" Collection

- 5 Choice varieties, our selection, 3-4 ft. \$7.50

"Children's" Collection

- 10 Cherries and Crabs for \$5.00
- 1 yr. old

Ornamental Trees

ACER PALMATUM (Japanese Maple).

A. Palmatum Atropurpureum (Scarlet Japanese Maple). The most popular of the colored foliage trees.

2 ft.	\$2.50	5 ft. specimens	\$15.00
2½ ft.	3.50	6-7 ft. Specimens.....	25.00
3 ft.	5.00		

A. Palmatum Dissectum (Weeping cut-leaf or fern-leaf Japan Red-leaf Maple).

Low and slow-growing type; very rare and scarce; spreading branches.

3 ft. wide	\$15.00	4 ft. wide	\$20.00
		3 yr. old Plant	\$4.00 each

BETULA (Birch).

B. Alba (European White Birch).

	Each	Ten
18 to 24 in.	\$0.50	\$4.00
24 to 30 in.75	6.50
30 to 36 in.	1.00	9.00
4 to 5 ft.	1.75	...
5 to 6 ft.	2.00	...

B. Alba Fastigiata (Pyramidal White Birch).

5 to 6 ft.	\$3.50 each; \$30.00 per 10
-----------------	-----------------------------

B. Alba Laciniata (Cut-leaf Weeping Birch). White bark, weeping branches.

5 to 6 ft.	\$3.50
7 to 8 ft.	5.00
8 to 10 ft.	7.50

CASTANEA (Sweet Chestnut). Hybrid Sweet Chestnut producing a heavy crop of fruit when less than five years old. This variety is immune to chestnut blight. The fruit is as sweet as the susceptible old-time American Sweet Chestnut, varies considerably in size—from the size of the old-time Chestnut up to the size of the Sweet Spanish Chestnut.

2 yrs. old	\$0.75 each; \$6.50 per 10
Bearing Age	3.50 each; 30.00 per 10
Bearing Age, 4 to 5 ft. high	5.00 each; 40.00 per 10

FAGUS SYLVATICA PURPUREA (Purple-leaved Beech). Deep purple foliage.

5 to 6 ft.	\$5.00	7 to 8 ft.	\$10.00	9 to 10 ft.	\$15.00
-----------------	--------	-----------------	---------	------------------	---------

PLATANUS ORIENTALIS (European Planetree). Rapid growing, symmetrical, most suitable for city street planting.

10 to 12 ft.	\$3.50 each
-------------------	-------------

POPULUS NIGRA ITALICA (Lombardy Poplar). Tall, rapid growing, fine for screens. Our trees are all shapely, branches to the ground.

10 to 12 ft.	\$2.00 each; \$15.00 per 10
12 to 14 ft.	3.50 " 25.00 " 10

SALISBURIA ADIANTIFOLIA (Ginkgo biloba, Maidenhair tree). A tree that can trace its pedigree in a straight line to the deposits of anthracite coal in which many of its progenitors are preserved. All of its insect pests have died meanwhile and it is immune to all present-day bugs. It is hardy, moderately fast growing, long living; a splendid shade tree.

5 to 6 ft.	\$1.50	10 to 12 ft.	\$7.50
6 to 8 ft.	3.50	12 to 14 ft.	10.00
8 to 10 ft.	5.00	14 to 16 ft.	15.00

SALIX (Willow).

S. Babylonica (Babylon Weeping Willow). An extremely pendulous variety of Weeping Willow. Branched to the ground, straight and exceptionally beautiful trees.

10 to 12 ft.	\$3.50	Bare roots
12 to 14 ft.	5.00	" "
14 to 16 ft.	7.50	" "

SORBUS AUCUPARIA (European Mountain Ash). Also known as Rowan Tree.

According to Aesop, "the birds in the top of the tree were eating the beautiful orange and red colored fruit, and the fox did not care for it because it was sour anyway." Be that as it may, it is one of the most lovely of all the fruit-bearing ornamental trees.

3 to 4 ft.	\$1.50	5 to 6 ft.	\$2.50
4 to 5 ft.	2.00	8 to 10 ft.	7.50

Flowering Bushes

ARONIA ARBUTIFOLIA (Red Chokeberry). The fruit is conspicuously attractive in the garden and to a minor degree to birds. Best red fruited native shrub.
2 to 3 ft. (covered with fruit) \$1.00 each

AZALEAS

A. Amoena (Sunset Azalea). Evergreen. The color of the sunset, extremely effective in the soft light of the evening at sunset and after; most restful coloration; not at its best in the glare of full sunlight. Grows best in the open. Flowers are double or hose in hose of a lovely purple produced by the thousand, obliterating the foliage.

	Each	Each
3 ft. wide x 2½ ft. high	\$5.00	4½ ft. wide x 3½ ft. high \$8.00
3½ ft. wide x 2½ ft. high	6.00	5 ft. wide x 3½ ft. high 10.00
4 ft. wide x 2-3½ ft. high	7.50	

A. Hinodegiri (Sunrise Azalea). Rosy red. Evergreen. Most effective in front of Evergreens.

	Each	Ten		Each	Ten
10 to 12 in. wide	\$1.60	\$15.00	26 to 28 in. wide	\$7.50	\$60.00
12 to 15 in. wide	2.10	20.00	2½ ft. wide	10.00	90.00
15 to 18 in. wide	3.00	25.00	3 ft. wide	15.00	135.00

20 to 24 in. wide	5.00	40.00	4 ft. wide	30.00	250.00

A. Indica Alba (also known as *Ledifolia alba*). Evergreen, fragrant, snow white, large single flowers; blooms normally here about Memorial Day or earlier.

Width	Height	Each	Width	Height	Each
24 to 30 in.		\$5.00	4½ ft.	2½ ft.	\$30.00
3 ft.	2½ ft.	12.50	5 ft.	3 ft.	35.00
3½ ft.	2½ ft.	17.50	5½ ft.	3 ft.	40.00
4 ft.	2½ ft.	25.00	6 ft.	3½-4 ft.	50.00

Our strain or variety of this choice Azalea is very much superior to any offered anywhere in Pennsylvania. Larger blooms and more of them; purer white; more fragrance.

A. Kaempferi Hybrids. Tall growing deciduous shrubs, hardy and free flowering. Blooms in May. Color range: pink, rose and red; mixed.

	Each	Ten
1½ to 2 ft.	\$3.00	\$25.00
2 to 2½ ft.	4.00	35.00
2½ to 3 ft.	5.00	45.00

A. Mollis. A hardy prolific, deciduous Chinese Azalea, in orange and yellow.

	Each	Ten
Pure yellow, 12 to 15 in.	\$3.00	\$25.00
Pure yellow, 15 to 18 in.	4.00	35.00
Pure yellow, 18 to 21 in.	5.00	40.00
Orange, 15 to 18 in.	3.00	25.00
Orange, 18 to 24 in.	4.00	30.00

A. Mucronulata. Upright growing, compact branches, splendid foliage, extremely early flowering, violet colored flowers of good size and produced in extreme abundance.

	Each	Ten
2½ ft. high	\$3.50	\$30.00
3 ft. high	4.00	35.00
3½ ft. high	4.50	40.00

Azaleas continued

A. Pink Pearl, a kurume variety with large, full flowers of unusual salmon-pink, paling towards their centers. Evergreen.

Width	Height	Each	Ten
18 to 24 in.	15 to 20 in.	\$6.00	\$50.00

A. Schlippenbachi (The Royal Azalea). A lovely deciduous azalea, hardy and vigorous, brought by us from Korea and produced here from seeds from the originally imported plants. The flowers are large, single, clear pink; the leaves shaped like those of the oak.

	Each	Ten
18 to 24 in. high	\$3.50	\$30.00
24 to 30 in. high	4.50	40.00
30 to 36 in. high	6.00	50.00

FLOWERING QUINCE (Cydonia Japonica)

JAPAN QUINCE (popularly known as "Japonica"). We offer some choice seedlings 4 years old from which many choice and new varieties will come. I have great expectations from this lot.

	Each	Ten
12 to 15 in., dwarf type, 4 yrs.	\$0.50	\$4.00
15 to 18 in., dwarf type, 4 yrs.	.65	5.00
18 to 24 in., regular type, 4 yrs.	.75	6.00
2 to 3 ft., salmon pink	2.50	20.00
2 to 3 ft., white	2.50	20.00
3 to 3½ ft., white	3.50	30.00
4 ft. red, not heavy	3.50	30.00
3 to 4 ft., coral pink, imported	4.00	32.50

ENKIANTHUS CAMPANULATUS (Redvein Enkianthus). Deciduous, but holds its foliage very late. Bell shaped flowers in terminal umbels, yellow and red.

2 ft.	\$2.00 each	3 ft.	\$4.00 each
-------	-------------	-------	-------------

KERRIA JAPONICA FLOREPLENO (Double Kerria). Golden-yellow double flowers.

2½ to 3 ft.	\$1.50 each
-------------	-------------

LAGERSTROEMIA (Crapemyrtle). Crapemyrtle are considered of uncertain hardiness in the vicinity of Philadelphia, but we have wintered them successfully, with the exception of one extremely cold winter a few years ago when the temperature went to the lowest degree in 92 years, and most of our plants froze down to the ground. They have recovered now and are in good condition. The variety we offer is **William Toovey**. It is the finest of the Crapemyrtles, of neat, compact habit, producing a solid mass of beautiful deep watermelon-red flowers in large heads.

24 to 30 in.	\$3.50 each
3 ft. (grown in tubs)	4.00 each

We can supply much larger field-grown plants. Ask for prices.

SPIREA VAN HOUTTEI. A fine shrub for lawn specimen or massing; white flowers in May. The young plants we offer will reach a height of 30 to 36 inches the first year after planting under normal conditions.

2 yrs.	50c each	\$3.00 per 10
--------	----------	---------------

STYRAX OBASSIA (Fragrant Snowbell). Grows to an ultimate height of 20 ft. A small Japanese tree; leaves 10 inches long, nearly orbicular to oval, pubescent beneath; flowers fragrant, white; in many flowered racemes 8 inches long; fruit ¾ inch long.

2 to 3 ft.	\$2.00 each	5 to 6 ft., heavy	\$5.00 each
3 to 4 ft.	3.00 each	6 to 8 ft., heavy	6.50 each
4 to 5 ft.	4.00 each	8 to 9 ft., heavy	7.50 each

LILACS

SYRINGA (Lilac). Hybrid varieties:

- Belle de Nancy**, double, satiny rose, white center.
- Berryer**, semi-double, clear mauve.
- Capitaine Baltet**, single, purple-lilac.
- Charles X**, single, bluish violet-red.
- DeMirabel**, single, dark bluish violet.
- Diderot**, single, large claret-purple.
- Emile Gentil**, single, bright lavender-blue.
- Hugo Koster**, single lilac with reddish-tint.
- Jan Van Tol**, single white,
- Katherine Havemeyer**, double blue.
- Lamartine**, single lilac, early.
- Ludwig Spaeth**, single violet.
- Marechal Lannes**, double, reddish-purple.
- Marie LeGraye**, single white.
- Mme. Casimir Perier**, double white.
- Mme. Lemoine**, double white.
- Montaigne**, single pink, very tall.
- Mont Blanc**, single white.
- Mrs. Edw. Harding**, double red.
- President Fallierres**, double pale lavender.
- President Grevy**, double, light blue.
- President Viger**, double, purple tipped deep pink.
- Ruhm von Horstenstein**, single red, tall.
- Vestale**, single white.
- Volcan**, darkest purple.
- Waldeck Rosseau**, double violet.

1 yr. plants, 50c each; 2 years, \$1.25 each.

VIBURNUM.

Viburnum Burkwoodi (Fragrant Evergreen Viburnum). An improved *V. Carlesi*, as fragrant as *Carlesi*, blooms one to two weeks earlier. Waxy pinkish white flowers; brilliant autumn foliage. Flower heads up to four inches wide and 100 to 150 individual flowers. Grows 5 to 6 feet high.

3 ft. high, \$4.00; ten for \$45.00.

Viburnum Carlesi (Korean Fragrant Viburnum) pink flowers.

2 ft. \$2.50; 2½ ft. \$3.50; 3 ft. heavy \$5.00

Hedge Plants

BERBERIS (Barberry)

B. Thunbergi (Japanese Barberry). Green foliage turning scarlet in fall; bright red berries. Ideal for hedges. Spaced 18 to 30 inches apart.

	10	100	1000
15 to 18 in.....	\$3.00	\$20.00	\$150.00
18 to 24 in.....	4.00	30.00	175.00
24 to 30 in.....	5.00	40.00	200.00

B. Thunbergi Atropurpurea (Red Japanese Barberry). Similar to the green-leaved Japanese Barberry, but the foliage of this new variety is a rich, bronzy-red, and becomes more gorgeous throughout the summer; in the fall it changes to vivid orange and red shades. Should be planted in full exposure to sun to obtain its brilliant coloring.

	Each	10	100
15 to 18 in.....	\$0.50	\$3.50	\$25.00
18 to 24 in.....	.75	5.00	35.00
30 in. and up.....	1.00	7.50	50.00

BUXUS SUFFRUTICOSA (Dwarf English Boxwood). Excellent for bordering walks, edging flower beds and rose gardens.

6 to 8 in..... \$0.25 each; \$16.00 per 100

MALUS ATROSANGUINEA (Carmine Flowering Crab). Spaced for hardy hedges 2 to 2½ feet for the smaller sizes; 3 to 3½ feet for larger bushes. Plant 6 inches deeper than they were in our nurseries. Pack soil well. Clip as desired.

2 to 2½ ft.....	\$35.00 per 100; \$10.00 per 25
2½ to 3 ft.....	45.00 per 100; 13.50 per 25
3 to 4 ft.....	60.00 per 100; 18.75 per 25

PYRACANTHA (Evergreen Thorn or Firethorn).

P. Coccinea. Grows quite irregular and may not be of equal spread in all directions, but can be trimmed to perfect hedges. Brilliant scarlet berries lasting until New Year. Spaced 2½ feet for hedges.

In 4 in. pots.....	\$1.00 each; \$7.50 per 10
In 5 in. pots.....	1.50 each; 10.00 per 10
In 12 in. tubs.....	4.00 each; 35.00 per 10

TAXUS CUSPIDATA CAPITATA (Upright Japanese Yew). Upright growing, cone-shaped, ideal for hedges. Extremely hardy.

2½ to 3 ft.....	\$250.00 per 100; \$75.00 per 25
3 to 3½ ft.....	375.00 per 100; 100.00 per 25

(For larger sizes, see page 21)

Evergreens

BUXUS SUFFRUTICOSA (Dwarf English Boxwood). Hardy type. The plants we offer are 24 years old.

	Each	Ten		Each	Ten
16 to 18 in.	\$4.00	\$30.00	22 to 24 in.	\$6.00	\$50.00
18 to 20 in.	5.00	40.00	24 to 26 in.	7.50	60.00

We offer smaller sizes for bordering walks, edging flower beds and rose gardens:

	Each	Ten		Each	Ten
5 to 6 in.	\$0.50	\$4.00	8 to 10 in.	\$1.50	\$12.50
6 to 8 in.	1.00	9.00	10 to 12 in.	2.00	15.00

CEDRUS ATLANTICA GLAUCA (Blue Atlas Cedar). Similar to the Cedar of Lebanon that King Solomon and Hiram, King of Tyre, made famous when they built the Temple. Our trees were transplanted recently and have good roots.

Fine specimen trees \$35.00 to \$75.00 each

CHAMAECYPARIS (Retinospora).

Retinospora obtusa gracilis (Slender Hinoki Cypress). The one good and valuable variety in the entire family of Chamaecyparis. Slow growing and not likely to grow out of bounds. Dark green foliage, columnar in growth.

	Each	Ten
4 to 5 ft.	\$6.00	\$50.00
5 to 6 ft.	7.50	65.00

Retinospora obtusa nana. The kind the Japanese use for the making of "300 year old" trees. Ours are 18 years old, and 24 to 36 inches high.

\$7.50 to \$20.00 each

CRYPTOMERIA (Japan Temple Tree).

C. Japonica Lobbi. A stately strong growing evergreen tree. General outline is columnar; spread of width generally one-fourth the height.

	Each		Each
3 to 4 ft.	\$3.50	10 to 12 ft. heavy	\$20.00
4 to 5 ft.	4.50	12 to 14 ft. "	35.00
5 to 6 ft.	6.00	14 to 16 ft. "	50.00
6 to 7 ft.	7.50	16 to 18 ft. "	60.00
7 to 8 ft.	10.00	18 to 20 ft. "	100.00

C. Japonica Wohlerti (Wohlert's variety). A superior compact-growing sort, slower than "Lobbi", but the branches are placed much closer, giving a smooth outline; resistant to low temperatures.

2 to 2½ ft.	\$4.00 each	3 to 3½ ft.	\$6.00 each
2½ to 3 ft.	5.00 "	3½ to 4 ft.	7.50 "

ILEX (Holly)

I. Aquifolium (English Holly). Entirely hardy from Philadelphia South. Our trees have lived in our nurseries for the past 15 years.

36 in. high	\$6.00	48 in. high	\$10.00
Ten years old \$15.00 to \$25.00 each			

PICEA PUNGENS HOOPSI (Hoopes' Blue Spruce). The only variety we offer. It was introduced by Hoopes Bros. & Thomas, of West Chester, Pa., and sold at \$1.00 per inch. Since then we have produced a great many and have materially cut the price in spite of the fact that it is very much superior to any and all of the Blue Spruces offered—far superior to Moorheim and Koster. It is practically silver-white. As it is utterly impossible to sell any of the other varieties when they are located anywhere near this Hoopsi, we have abandoned all the other varieties excepting a few Koster's which we will offer in such sizes as we may have at about one-half the price of Hoopsi Spruce.

18 to 24 in.	\$4.00	4 to 5 ft.	\$12.50
24 to 30 in.	5.00	5 to 6 ft.	15.00
30 to 36 in.	7.50	6 to 7 ft.	20.00
3 to 4 ft.	10.00	7 to 8 ft.	25.00
Small 6 to 10 inch, \$1.50; 10 to 12 inch, \$2.00			

TAXUS (Yew Trees). European and Oriental.

Taxus Baccata Fastigate (Irish Yew). Strong shapely trees. Columnar.

Mature solid plants, 5 to 6 ft., \$25.00 each
 " " " 6 to 7 ft., 30.00 "

Taxus Cuspidata (Spreading Japanese Yew). Well shaped and transplanted. All sheared trees.

	Each	Ten
2½ to 3 ft. wide, sheared	\$4.00	\$35.00
3 to 3½ ft. wide, sheared	5.00	45.00
3½ to 4 ft. wide, sheared	7.50	70.00
4 to 5 ft. wide, sheared	10.00	
5 to 6 ft. wide, 4 to 5 ft. high	20.00	
6 to 7 ft. wide, 5 ft. high	25.00	
7 to 8 ft. wide, 6 ft. high	30.00	
8 to 9 ft. wide	50.00	
10 ft. wide sheared	60.00	

Taxus Cuspidata Capitata (Upright Japanese Yew). Upright growing, cone-shaped trees, horizontal branches, red fruit, sheared trees.

	Each	Ten
2½ to 3 ft. for hedges and other uses	\$4.50	\$35.00
3 to 3½ ft. for hedges and other uses	5.50	45.00
3½ to 4 ft. for specimen uses	6.50	55.00
4 to 4½ ft. for specimen uses	10.00	90.00
4½ to 5 ft. for specimen uses	15.00	125.00
5 to 6 ft. for specimen uses	17.50	
7 ft. specimens	20.00	
8 ft. specimens	25.00	
9 ft. specimens	35.00	
10 ft. specimens	40.00	
11 ft. specimens	50.00	

Taxus Cuspidata Brevifolia (Dwarf Japanese Yew). One of the best dwarf evergreens and typically Japanese in beauty.

15 to 18 in. wide	\$2.50	\$22.50
18 to 20 in. wide	3.50	30.00
20 to 24 in. wide	4.50	40.00
24 to 30 in. wide	5.50	50.00
30 to 36 in. wide	10.00	90.00
3 to 4 ft. wide	16.00	150.00
4 to 5 ft. wide, 25 years old	30.00	
5 to 6 ft. wide, 25 years old	40.00	
6 to 7 ft. wide, 25 to 30 years old	50.00	
7 to 8 ft. wide, 25 to 30 years old	60.00	
8 to 9 ft. wide	75.00	

These choice specimens are worth twice our price.

Taxus continued

Taxus Media Hicksi (Hicks Yew). Upright, columnar, no tendency whatever for horizontal branches.

	Each	Ten		Each	Ten
2½ to 3 ft. . . .	\$4.00	\$35.00	4½ to 5 ft. . . .	10.00	
3 to 3½ ft. . . .	5.50	50.00	5 to 6 ft. . . .	12.50	
3½ to 4 ft. . . .	7.50	70.00	6 to 7 ft. . . .	15.00	
4 to 4½ ft. . . .	9.00	80.00			

TSUGA (Hemlock).

T. Canadensis (Canadian Hemlock Spruce). Sheared plants.

	Each	Ten		Each	Ten
2 to 2½ ft. . . .	\$2.50	\$20.00	6 to 7 ft. . . .	\$7.50	\$60.00
2½ to 3 ft. . . .	3.00	25.00	7 to 8 ft. . . .	10.00	80.00
3 to 3½ ft. . . .	3.75	30.00	8 to 9 ft. . . .	12.50	100.00
3½ to 4 ft. . . .	4.50	35.50	12 to 14 ft. . . .	25.00

5 to 6 ft. . . .	6.00	50.00	16 to 18 ft. . . .	50.00	

T. Caroliniana (Carolina Hemlock Spruce).

10 to 12 ft., \$25.00 each; 12 to 14 ft., \$35.00 each.

THUJA (Arborvitae). Pyramidal and American Arborvitae for hedges and screens.

	Each	Ten	100
8 to 9 ft.	\$5.00	\$40.00	\$300.00
9 to 10 ft.	7.50	50.00	350.00
10 to 12 ft.	10.00	75.00	
12 to 14 ft.	15.00		

BIGNONIA RADICANS (Trumpet Vine). Tubular red flowers in July.

Plants from tubs \$3.50

Plants from pots \$1.50

CLEMATIS

CLEMATIS, hardy varieties. Thrives best in a rich garden loam of rather light texture. Sand and peat moss may be added to a heavy soil to loosen it. When planting, spread out the roots flat and sprinkle soil lightly over them. Avoid having all the roots in one bunch. Soil must be well drained where Clematis is to be planted. Since Clematis is partial to lime, it should be mixed with the soil when planting, and if necessary it may be occasionally added thereafter, working it well into the soil without disturbing the roots.

Large-Flowering Varieties

Ascotiensis , azure blue	\$1.50	Lady Betty Balfour , purple	1.50
Belle of Woking , double, silvery gray	1.50	Lady Caroline Neville , white with mauve bars	2.00
Comtesse de Bouchard , rose pink	1.50	Lawsoniana , large sky blue	1.50
Crimson King , red	2.25	Lord Neville , plum color	1.50
Duchess of Edinburgh , double, pure white	1.00	Mme. Baron Veillard , silvery pink	1.00
Elsa Spath , bright blue	1.50	Mme. Edouard Andre , red	1.00
Gipsy Queen , violet purple	1.50	Mrs. Cholmondeley , light blue ..	1.50
Henryi , large white flowers	1.00	Nelly Moser , mauve and white ..	1.50
Huldine , white	2.25	Prins Hendrik , azure blue, ruffled ..	2.00
Jackmanii , violet-purple	1.00	Ramona , large, sky blue	1.00
Jackmani , rubra, red variety of Jackmani	2.25	The President , reddish plum-violet ..	1.50

Montana undulata , mauve pink ..	1.00	Troutbeckiana , lavender	2.25
		Virginiana , white, very strong ..	.50

PACHYSANDRA TERMINALIS (Japanese Spurge). A beautiful evergreen ground cover, perfectly hardy, and endures dense shade and dry locations. It forms a solid mass of green about 8 inches high in one year if planted close enough. The distance between the plants depends upon the size you buy and your idea of what is close enough, and your patience while the plants are spreading.

The ground should be prepared to a depth of eight inches. For fertility, use whatever is easiest to get—leaf mold, mushroom soil, or pulverized poultry manure. For 1000 plants about 10 bushels of poultry manure would be sufficient. We can supply 10 bushels for \$7.50.

	100	1000
1 year Pachysandra plants	\$5.00	\$30.00
2 year Pachysandra plants	7.50	50.00
3 and 4 year plants	10.00	65.00

VINCA MINOR (Periwinkle or Trailing Myrtle). A trailing, evergreen plant, used extensively for carpeting the ground under shrubs or trees, or on graves. Blue flowers.

\$1.50 per 10 \$10.00 per 100

BOWLES VARIETY — an improved form of Vinca Minor, Flowers larger, deeper blue and borne with remarkable profusion, and also produced during the autumn.

One year field plants, \$12.00 per 100

3" pots 35c each; \$20.00 per 100

4" pots 50c each; 30.00 per 100

Perennials

DICENTRA SPECTABILIS (Bleeding Heart). In cultivation over one hundred years, yet not common, extremely early flowering.

Plants 50c each; large clumps \$1.00

HEMEROCALLIS (Daylilies). The only perennial that blooms all summer. Extremely hardy. Bugs are not interested in the flowers or the plant. Some of the varieties we offer are worth \$1.00 up to \$3.50, but we have decided to offer them all at one price. Ask for our list of 30 varieties.

Divisions, 50c each; Clumps, \$1.50 each.

IRIS. Fancy new varieties, large flowers, all colors, all named. One variety blooms fall and spring. Ask for our list.

25c each; \$2.50 per dozen.

LILIUM ELEGANS (Hardy Red Lily). Every bulb a blooming-size bulb; every one has borne blossoms this season. This is an all-red lily, no variations. Also known as "Red Russian"; the best all-red lily wherever hardiness is a consideration. Ideal for rockeries and naturalization. 18 to 24 inches high.

5 for \$1.00; 10 for \$1.50; 100 for \$12.00.

OPHIPOGON JABURAN (Lily Tuft). Blue flower spikes well over the foliage; the curving foliage is 12 inches long, and stays in good condition winter and summer. When Lily Tufts are planted in rows they form the perfect edging (border) plant, enclosing the flower beds perfectly if planted one foot apart. Also a good house plant.

30c each; \$2.50 per 10; \$20.00 per 100.

PAEONIA. The most favored perennial is the Peony. Our Peonies are from a private collection assembled by a very discriminating Peony fancier. Some of the varieties cost him \$20.00 and up. Unfortunately they are not labelled, but they are all exceptionally choice varieties, large enough and old enough to produce a heavy crop of flowers the first year. We can supply them in pink, red and white.

Divisions, 25c each; 5-year-old clumps, \$3.00 each.

WISTARIA

We particularly recommend the Oriental Wistaria as an ornamental vine available in a large assortment of varieties and colors, including lavender, purple, pink and white. The flower clusters range from 10 inches on the Chinese, to the long cluster varieties of the Japanese Wistaria, reaching four feet or more on the varieties Kyushaku, Penn Valley and Naga Noda.

The following prices cover vines of various ages, also Standards or Tree Form. The Standards are graded according to the caliper of the trunk and spread of the crown.

A non-removable tag will be attached to each Wistaria. It is your guarantee that the plant is true to name and in good condition. If it fails to grow, a free replacement will be made if you pay packing and transportation charges. If demanded by us, the buyer must be willing to return the dead vine, or the part to which the seal is attached.

Fruit Tree Department

ESPALIER TRAINED DWARF FRUIT TREES

Distinctive — Practical — Decorative

Trained Fruit Trees should have a place in every garden, and we are sure many gardeners will welcome our offer of these trees at this time. It is a simple matter to erect a "post and wire" fence to which they may be lightly tied or to a "wired wall," which is accomplished by driving wall hooks into the wall at intervals of 1 foot each way, leaving 4-5 inches protruding, to which the galvanized wires are horizontally attached. The "leaders" of the trees are carefully tied to the wires by "figure of eight" loops of tarred twine or heavy raffia, which allows limited leeway and prevents chaffing. Trained trees should be planted 12 to 15 inches from a wall to allow for fruit development.

Beware of cheap espalier trees, for if they are offered at materially less than our prices they cannot be dwarfs but are ordinary orchard trees trained, and they cannot be kept down to the confined space no matter what you do.

Trained trees enable the owners of small properties to utilize wall space which might otherwise be wasted. The side of a building fence may thus be made to produce surprisingly large crops of choice apples, pears, peaches, cherries and even nectarines. Only three years are required ordinarily for these trees to reach the bearing age, and apart from their practical value, they lend a touch of the "old world" to the garden which is seen all too rarely in this country.

The varieties of fruits listed below have been chosen for their adaptability to espalier work and the high quality of fruit. Under each espalier form we list the fruits available in that particular form.

Apples—Duchess of Oldenburg, Delicious, Fameuse, McIntosh, Baldwin, R. I. Greening, Cortland, Wealthy.

Pears—Bartlett, Flemish Beauty, Clapp's Favorite, Duchess d'Angouleme, Beurre d'Anjou, Seckel.

Plums—Reine Claude, Abundance.

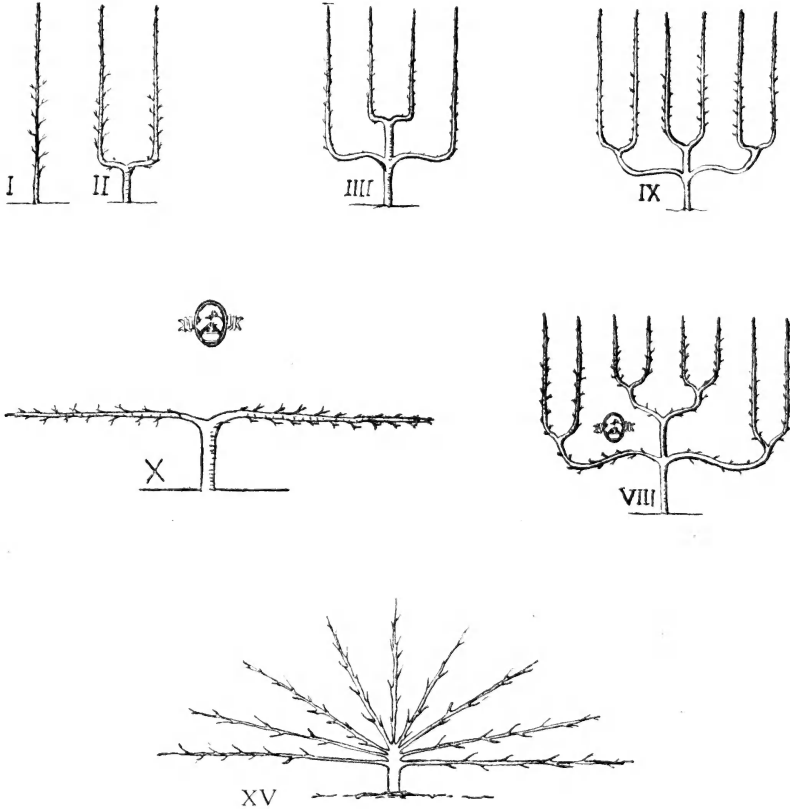

Peaches—Crawford, Rochester, Elberta, Hiley, Yellow St. John, Champion.

Nectarines—Napier, Boston, Red Roman, Newton, Victoria.

Apricots—Early Golden, Moore Head.

Key	Type	Each
II	U Form, 4-6 ft., all varieties excepting Pears	\$7.00
	Double U Form, 6 ft. high x 5 ft. wide	13.50
	Available in Peaches and Nectarines.	
IX	3-fold U Form, Apples and Pear only. 4 to 5 ft.	16.00
	6 to 8 ft.....	20.00
IV	4-branch Palmette Verrier. 5 to 6 ft.	11.00
	6 to 8 ft.....	14.00
	Available in Apples, Pears and Plums.	
VI	6-branch Palmette Verrier. 4 to 5 ft.	17.00
	5 to 7 ft.....	20.00
	Available in Apples and Pears.	
VIII	8-branch Palmette Verrier. 5 to 6 ft.	28.00
	6 to 7 ft.....	35.00
	Available in Apples and Pears.	
I	Single Cordon, all varieties	4.50
	Horizontal for Corners. Apples and Pears	6.00
X	Horizontal Cordons, 2 arms, 6 ft.	8.00
	6 to 8 ft.	14.00
XI	Horizontal Cordon, 4 arms, 6 to 8 ft.	18.00

- VII **Horizontal Cordon**, 6 arms, 6 to 8 ft. 18.00
 Available in Apples and Pears.
- V-Shaped Trees for Belgian Fence**, 6 ft. 6.00
 Available in Apples, Pears and Plums
 (Not less than five trees are required to complete the lattice pattern.
 Usually planted from two to three feet apart.)
- XV **Fan-Shaped Tree, in all varieties**, 6 ft. x 6 ft. 14.00
 6 ft. x 8 ft. 18.00

We can supply a few Horizontal Cordons, similar to type X shown above, only with four arms and six arms. These trees are yet plastic and can be trained into the Palmette Verrier form by any amateur.

3 year old, 2 arms. Bottom arm 6 to 8 ft. wide, top arm...
 3 to 4 ft. Height: 3 to 4 ft. **\$7.00 each**

4 year old, 3 arms. Bottom arm 7 to 9 ft. wide, second
 arm 5 ft. wide; top arm 3 ft. Height: 4 to 5 ft. Price **\$10.00 each**

In Apples and Pears only, our selection.

DWARF FRUIT TREES

Dwarf Pears: Bartlett, Clapps Favorite, Seckel, Kiefer, Duchess.
 2 yrs. old \$1.50 each \$9.00 per 10
 Bartlett: Bearing Age, 4 ft. high, \$4.00 each.

Dwarf Apples: Cortland, Delicious, Early Harvest, Sweet Bough.
 2 yr. \$1.50 each
 3 yr. 2.00 "

Dwarf Peaches: J. H. Hale, Belle of Georgia.

These peaches are grafted on plum, having a tendency to slow down the growth considerably and promoting production of fruit immediately. Our experience seems to indicate that they will begin to produce at least the second year after they are planted. The growth is considerably less rampant than those grown on peach roots. Also they transplant somewhat easier, as plum roots are much more efficient.

2 yr. old 75c each \$6.00 per 10

STANDARD FRUIT TREES

In all the leading varieties:

	Each	10	100
Apple 5 to 6 ft.....	\$1.25	\$10.00	\$65.00
Cherry 5 to 6 ft.....	1.50	12.50	80.00
Peach 5 to 6 ft.....	1.00	8.00	50.00
Pear 5 to 6 ft.....	1.25	10.00	65.00
Plum 5 to 6 ft.....	1.50	12.00	80.00

HANSEN BUSH CHERRIES

Hansen Bush Cherries. The new quick-bearing Cherry—easy to grow—sure to produce. This is a new development in fruit culture that is gradually changing the method of plum and cherry fruit production throughout the northwest, because of the immense amount of choice quality fruit that can be produced on such a very small area.

The fruit is of large size, good flavor and quality to eat fresh and make the most wonderful rich-flavored, dark purple-red jam. The juice makes splendid jelly as well as a not to be forgotten cordial that won't be kept long.

The fruit of this new cherry much resembles a plum in size and shape. It comes massed in clusters and at times almost completely covers the limbs. The tree itself grows in a bush-like shape, rarely over four or five feet tall, branching and bearing from the ground up, usually bearing the year after planting, though often the year they are set out and annually thereafter. This dwarf stature is of value in the garden as it does not take up the room of an ordinary plum tree yet often bears more. They should be planted two to four feet apart in rows four to six feet apart; twelve to twenty-five or more in every home garden.

In landscape planting the Bush Cherry also is desirable as it is of striking ornamental value, its dwarf bushy nature is of great aid in foundation planting, or they may be planted close enough for a low fruiting hedge on the lawn or in the garden.

The foliage is a beautiful silvery green, turns to a rich red and gold in Fall and adds a very desirable touch to any landscape. The profuse masses of large fragrant white flowers completely cover the branches and are a glorious sight in early Spring.
